## **COURSE OVERVIEW**

The goal of this symposium is to provide the Dental healthcare provider with the fundamental knowledge of the multidisciplinary care of the adult and pediatric cancer patient and the sequelae of oncologic treatment. Particular focus will be placed on the management of patients with head and neck cancer, hematologic malignancy, pediatric cancer and those treated with bisphosphonate therapy.

## **TARGET AUDIENCE**

This symposium should be of value to the practicing general and specialist dentists, selected physicians, hygienists, and dental students and residents.

## **EDUCATIONAL OBJECTIVES**

At the conclusion of this course, the participant should be able to:

- Identify the basic concepts of cancer and cancer therapy;
- Provide thorough dental/oral evaluation and treatment prior to commencement of chemotherapy, head and neck radiation therapy, stem cell transplantation and bisphosphonate therapy.
- Address the dental needs of the neutropenic and thrombocytopenic patient;
- Communicate and coordinate care with the patient's oncologic team;
- Recognize, diagnose and manage the sequelae and/or complications of cancer treatment such as treatment-induced xerostomia, osteoradionecrosis of the jaw and bisphosphonate-related osteonecrosis of the jaw, routine dental infections having had radiation/bisphosphonate therapy.
- Provide care for the long-term cancer survivor.
