

## SPEAKER

Dr. Roser is currently the DeLos Hill Chair, Professor and Chief of the Division of Oral and Maxillofacial Surgery at Emory University School of Medicine in Atlanta, GA. He received his dental and medical degrees from Harvard University.

Following completion of residency in oral and maxillofacial surgery at

Massachusetts General Hospital, he joined the faculty at Harbor UCLA Medical Center in Torrance, CA. In 1981 he was appointed Division Director of Oral and Maxillofacial Surgery at Columbia University College of Dentistry and Director of the Presbyterian Hospital Dental Service in New York. During his twenty three year tenure at Columbia, he was appointed as the George Guttman Professor of Craniofacial Surgery and developed a combined MD oral and maxillofacial surgery residency training program

In 2004 Dr. Roser joined the faculty at Emory. In addition to his interest in education, since 1991, Dr. Roser has organized international missions performing surgical repair of cleft lip/palate deformities. He is currently the Chair of the Committee on Global Surgery for the International Association of Oral and Maxillofacial Surgeons. Prior to relocating to Atlanta, Dr. Roser served on the Board of NYSSOMS and was Vice President in 2003.

New York City

# REGISTRATION FORM

## SYNOPSIS

The management of medical diseases has changed as the result of new diagnostic studies, new medications, and the incorporation of evidence-based medicine into patient management. This presentation will use case-based scenarios to review the current guidelines and recommendations for the effective surgical and anesthesia management of OMS patients.

## LEARNING OBJECTIVES

1. Discuss currently understood guidelines and recommendations for the safe and effective management of surgical and anesthesia patients with significant systemic disease.
2. Incorporate new evidence-based medical management guidelines into the management of patients undergoing office based or hospital anesthesia and surgery.
3. Become familiar with the use of newer medications for the treatment of medical conditions in the perioperative patient.

## DESIRED PRACTICES

Surgeons providing full scope of inpatient and outpatient oral and maxillofacial surgery services will need to provide perioperative care based on evidence-based guidelines to patients with concomitant medical conditions. Surgeons, in addition, need to become familiar with the use of newer medications for the treatment of medical conditions in the perioperative patient.

## CURRENT PRACTICES

Incorporate evidence-based guidelines into the participant's practice. Be familiar with the new medications being used to manage common medical conditions including coronary vessel disease, hypertension, diabetes, and bleeding problems.

## THE GAP

Evidence-based guidelines for the care of common medical conditions have become the standard of care. These guidelines, at times, are delayed in being published in the literature commonly read by oral and maxillofacial surgeons. New medications are introduced on a regular basis. Reading the medical literature to keep current is a daunting task.

## CONTINUING EDUCATION

This course is sponsored by the New York State Dental Association for four and one-half (4.5) hours of mandatory continuing education.

## PROGRAM

<b>8:00 – 8:45</b>	Registration & Continental Breakfast
<b>8:45 – 9:15</b>	Business Meeting
<b>9:15 – 10:45</b>	Lecture
<b>10:45 – 11:15</b>	Coffee Break
<b>11:15 – 12:30</b>	Lecture
<b>12:30 – 1:15</b>	Lunch Break
<b>1:15 – 3:00</b>	Lecture

## NYSSOMS Annual Meeting, Sunday, 3/26:

NYSSOMS Members	\$200	<input type="checkbox"/>
NYSSOMS Life Members	\$50	<input type="checkbox"/>
AAOMS Members	\$220	<input type="checkbox"/>
Non-AAOMS Member	\$300	<input type="checkbox"/>
OMS Resident	\$0	<input type="checkbox"/>

*There is an additional \$25 charge for on-site registrations.*
